EDUCATION

Georgia Institute of Technology

Atlanta, Georgia

Bachelor of Science Degree in Computer Science, GPA: 3.88 Expected Graduation: May 2025

EXPERIENCE

HP Inc.Software Engineer Intern

Fort Collins, CO

May 2023 - Present

• Developing a UI in React to chart and visualize data stored in hp.dev global catalog, providing users with data insights into various aspects of the catalog

Georgia Tech's Vertically Integrated Project Program

Atlanta, GA

Research Assistant

January 2022 - December 2022

- Implemented an advanced AI-based face recognition algorithm for miniature robotic blimps and autonomous underwater vehicles by leveraging TensorFlow, NumPy, and OpenCV
- Incorporated a Raspberry Pi in the blimp, providing data parsing from the facial recognition and secure uploading onto an SSH server
- Created a Python to MATLAB GUI that applied deep learning to improve a blimp pathfinding by 30% in terms of image quality and accuracy detection
- Facilitated with eight teammates to deploy a blimp that successfully broadcasted a Georgia Tech basketball game to 1,000+ people

NCR Corporation

Atlanta, GA

Software Engineer Intern

May 2022 - August 2022

- Constructed robust RESTful APIs using Go and Spring Boot, streamlining the request/response format for NCR consumer data
- Developed an intuitive RBAC configuration dashboard for NCR's Business Platform in Next.js to display and manage GraphQL API from over 60 million calls made by 100+ partner organizations
- Integrated an HTML viewer in the dashboard, empowering users to edit and render 50+ templates from NCR's Digital Receipt services
- Employed Chart.js to visualize data for top 10 organizations, enterprise units, and endpoints, allowing effective performance assessment
- Assisted in deploying the dashboard on Google Cloud Platform using GitOps, ensuring seamless integration and optimal site performance

UGA's Computer Science Department

Athens, GA

Teaching Assistant

June 2021 - December 2021

- Delivered in-depth feedback on weekly Java labs, guiding ~110 students in mastering core programming concepts over two semester
- Contributed to 12 Java assignment evaluation tools, significantly reducing grading time of student submissions to under 5 seconds

PROJECTS

 $\textbf{EatCode} \mid \textit{React, MongoDB, Express.js, TypeScript, Java, Python, Docker}$

github.com/RiRah123/EatCode

- Engaged with seven teammates to build a software engineering technical interview training website in React, enabling users to enhance their data structures and algorithms learning experience with 100+ questions in five supported programming languages
- Configured a MongoDB and Express.js backend system, tracking users' progress on problem-solving over the last 365+ days using their Google account ID

NCR Go | React Native, MongoDB, Python, Microsoft Azure

github.com/RiRah123/NCR-Go

- Spearheaded the development of a React Native application with six teammates that leverages computer vision technology to revolutionize the shopping experience by accurately detecting product availability and providing in-store location information
- Connected a neural network into the front end of the application, optimizing classification of in-store product images to $\sim 94\%$ accuracy and organizing inventory analytic in a MongoDB cluster
- Recognized as top 10 among 401 teams (4,800+ participants) and secured a patent by presenting to NCR's Executive Leadership Team

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, TypeScript, HTML/CSS, SQL, GraphQL

Frameworks/Libraries: React, Material UI, Next.js, React Native, D3.js, Spring Boot, NumPy, Pandas, PyTorch, Matplotlib Developer Tools: Jira, Azure, Docker, AWS, Postman, Figma, Terminal, Git, GitHub, Docker, JUnit, Kubernetes, Helm Concepts: Agile Development Process, Data Structures & Algorithms, RESTful APIs, Human-Computer Interaction, UI Design, Data Visualization, Software Development, Object-oriented Programming, Artificial Intelligence, Cloud Computing, Computer Architecture
